

PIN for EPCS

Manage Your EPCS PIN

If you are signed up for EPCS, you will need to create and verify a four-digit EPCS PIN code.

Create Your PIN: the system will ask you to create a new PIN when you transmit an Rx.

1. Enter a PIN in the DEA TFA window that pops up
2. Confirm the PIN
3. Click **Validate PIN**

The DEA Requires Two Factor Authentication (TFA) for signing of prescriptions with scheduled drugs. Once you have completed registration with Exostar, you must select a PIN. Each TFA Signing process will use two steps: first to enter your PIN, and then to enter the Passcode provided by your AUTHY Phone App or Hardware Token.

Create 4-digit PIN:

Confirm 4-digit PIN:

[Validate PIN](#)

NOTE: Your PIN is four-digits and cannot be repeating or sequential numbers. Do NOT share your PIN.

Use Your PIN: Your PIN is required when transmitting controlled Rx's.

1. Enter your PIN and click **Validate PIN**
